VaultedMetrics™

CAPABILITY STATEMENT

A software company registered in the State of Ohio, United States of America. Smart contracts and blockchain software.

CORE COMPETENCIES

Smart contract development
Programs on the Ethereum blockchain that carry out an agency's rules by themselves: scheduled distributions, conditional payments, records that cannot be altered, and agreements that cannot be changed after signing.

Verification and audit readiness
Independent proof that a smart contract does what its rules say: complete test suites, source verification on the public record, and preparation for and management of an independent audit.

Blockchain software and dashboards
Software that reads the blockchain and presents it in plain language: live proof pages, dashboards, record-keeping databases and reports, so that oversight does not require an engineer.

Blockchain advisory
Written assessments of whether a blockchain is the right tool for a program, which one, how the smart contracts should be structured, and what an audit should cover, with sources for every fact.

Training and education
Courses for staff who need to read, verify and oversee smart contracts without becoming engineers, with exercises on a test network and a written record of completion for each participant.

Tokenomics design and token launch
The rules of a token written so that the code enforces them, for agencies and public bodies that issue credits, credentials or units of record on a blockchain.

DIFFERENTIATORS

Every deliverable is verifiable by the agency
The agency's own staff verify the smart contract on a test network, with a written step-by-step plan, before the independent audit begins. The source code, the tests, the audit report and the signed rules document are all delivered.

Everything in writing
Every rule, question, answer and approval on an engagement is exchanged in writing and kept with the signed document. Nothing is agreed by word of mouth. Every record an auditor or an inspector general would ask for exists from the first day.

Payment follows completed, accepted work
Each engagement is paid in equal stages, each one due only after the step before it is finished and accepted. Nothing is paid in advance of the work it covers.

Live systems on the public record
Our token, vesting, treasury and liquidity smart contracts have run on Ethereum mainnet since 2026, independently audited, with every action on the public record and readable in plain language on the VM888 Terminal.

COMPANY DATA

Legal name	VaultedMetrics LLC
State	Ohio · 5560633
UEI	F437Y6PX3ZN7
CAGE	Pending
Size	Small business, self-certified in SAM, under every NAICS code listed
Entity type	Limited liability company, for-profit
Place of performance	Ohio, United States of America; work is delivered online to any location

NAICS

541511	Custom computer programming services (primary)
541512	Computer systems design services
541519	Other computer related services
518210	Computing infrastructure, data processing and hosting
541690	Other scientific and technical consulting services
611420	Computer training
519290	Web search portals and other information services

PSC

DA01 · DA10 · DJ01 · DF01

UNSPSC

43230000 Software · 81160000 Information technology service delivery · 81110000 Computer services

VENDOR REGISTRATIONS

Federal: SAM.gov. Registered in the System for Award Management under UEI F437Y6PX3ZN7. The Founder is the entity administrator. The CAGE code is pending activation.

State of Ohio: OhioBuys. Registered bidder with the Ohio Department of Administrative Services, eligible to respond to State of Ohio solicitations for information technology and software.

Small business programs. Counseled by the Ohio APEX Accelerator for federal contracting. We do not claim any set-aside status that has not been issued to us.
